

IN THE SPECIFICATION

Please replace the Abstract with the following amended Abstract:

A brushless motor has a stator 6, a rotor 7 and a circuit board-4 for controlling rotation of the rotor-7. The stator 6 has iron cores 4 and coils 2 wound around the iron cores. Switching elements 3 for turning on and off electric power to be supplied to the coils 2 for the stator are mounted to the circuit board-4. A heat-radiating member 5 is fixed to the iron cores-4.
